EDUCATION

Bachelor of Technology in Computer Science

Expected Graduation: 2027

Vellore Institute of Technology, Vellore, Tamil Nadu

- CGPA: 9.28/10.0
- Relevant Coursework: DSA, DBMS, OS, Computer Networks, Software Engineering, AI, System Design

TECHNICAL SKILLS

Programming Languages: Python, JavaScript/TypeScript (Node.js), Java, C, SQL

Web & Frameworks: React, Node.js, Express.js, Next.js, RESTful APIs, Socket.io, WebRTC, Flask, HTML5, CSS3

Database: MongoDB (NoSQL), MySQL (Relational) - Schema design, query optimization, data validation

Tools & Version Control: Git, Hoppscotch, Docker, AWS (S3, EC2, CloudFront), Nginx,

CS Fundamentals: OOP, DBMS, OS, Computer Networks, System Design

AI/ML: Gemini API, OpenAI API, OCR (Tesseract.js), NLP

AI Tools: Claude Code (Anthropic), Google AntiGravity, Google Stitch (Design), GitHub Copilot

PROJECTS

PRsonality - AI Code Reviewer with Multi-Persona Analysis 🔗

Jan 2026

AI Single Page Application (SPA) — [Live Site](#)

Tech Stack: React, Vite, Tailwind CSS, Framer Motion, Gemini API

- Built AI-powered codebase auditor with "Mental Cloning" architecture that selectively ingests repository structure, configs, and core files to generate contextual code reviews with precise error tracing
- Implemented three strategic AI personas (Kind Senior Engineer, Brutally Honest Reviewer, Startup CTO) using custom prompt engineering to deliver tailored feedback for different development lifecycle stages
- Developed high-fidelity UI with custom cursor physics engine featuring spring-based momentum, velocity-driven deformation, adaptive morphing, and glassmorphism design with animated aurora background

CareerMitra - AI-Powered ATS Resume Optimizer 🔗

Dec 2025 – March 2026

Full-Stack AI Application — [Live Site](#)

Tech Stack: React, Node.js, Docker, AWS (S3, EC2, CloudFront), Nginx, Gemini API

- Engineered a production-ready cloud architecture using AWS S3 and CloudFront for low-latency frontend delivery, with a Dockerized Node.js backend deployed on AWS EC2 using an Nginx reverse proxy and SSL (Certbot)
- Optimized infrastructure by bundling a TeX Live environment within a Docker image, enabling unlimited, zero-cost LaTeX resume compilation and real-time high-fidelity PDF generation in the cloud
- Developed a deterministic ATS scoring engine integrated with Gemini AI for semantic analysis and Tesseract.js for OCR-based text extraction from image-based resumes and scanned documents

NexMeet - Video Calling Platform 🔗

Jul 2025 – Oct 2025

Real-Time Communication System — [Live Site](#)

Tech Stack: React, Node.js, Express.js, MongoDB, Socket.io, WebRTC, JWT

- Designed scalable system architecture with MongoDB for meeting management, user authentication, and session handling with optimized database queries
- Built real-time peer-to-peer video conferencing using WebRTC and Socket.io with live chat, screen sharing, JWT authentication, and room-based routing for multiple concurrent meetings

Wanderly - Full Stack Property Booking Platform 🔗

May 2025 – Jul 2025

End-to-End Web Application — [Live Site](#)

Tech Stack: Node.js, Express.js, MongoDB, Passport.js, Razorpay API

- Architected MongoDB database with normalized schemas for property listings, bookings, and reviews with query optimization and aggregation pipelines
- Implemented RESTful API with Express.js middleware, error handling, Passport.js authentication, and Razorpay payment gateway integration, deployed on Render with API testing via Hoppscotch

JARVIS - AI Desktop Assistant 🔗

Dec 2024 – May 2025

AI and System Automation

Tech Stack: Python, Gemini API, Eel, PyAutoGUI, OpenCV, Porcupine

- Developed intelligent desktop automation system integrating Gemini API for conversational AI with natural language processing and command execution capabilities
- Implemented computer vision-based face authentication using OpenCV , Python multiprocessing for concurrent tasks, and modular architecture with Porcupine hotword detection

CERTIFICATIONS AND ACHIEVEMENTS

- Oracle Certified Generative AI Professional and Oracle Generative AI (Foundation)

OTHER QUALITIES

- Strong problem-solving mindset with ability to break down complex systems, identify edge cases, and design robust solutions
- Fast learner with agile adaptability to quickly master new technologies, frameworks, and engineering practices
